

# LARP Magnet Systems Memo

**LARP**

To: J. Schmalzle, F. Nobrega, D. Cheng, and people in charge of shipping LARP coils at BNL, FNAL and LBNL

From: G. Ambrosio, LARP Magnet Systems L2

Date: May 2, 2016

Subject: **QXF Coil Shipment**

---

## Introduction

LARP has shipped and is shipping QXF coils after curing, after potting and after instrumentation. QXF coils have different magnetic lengths: from 1 m (QXFS), to 4 m (QXFP), and 4.2 m (QXFA).

In the past different shipment methods were used depending on coil length and state (after curing or after potting). Recently some coils, which were supposed to be shipped with dedicated truck, were shipped with different methods.

## Directive

Effective immediately, **all QXF coils shipped from a US lab to another US lab shall be shipped with dedicated truck.**

## Exception policy

Exceptions shall be approved by the LARP Magnet Systems L2.
